# Donation Tracking App

About the App

- Emphasize the need for transparent contribution management in disaster-prone areas like the Philippines.
- Highlight the app as a lifeline for ensuring accountability and efficiency in donation allocation.

Key Components

- Illustrate the login process and its significance in ensuring secure access to the app.
- Emphasize user authentication and data security.
- Show how the app registers new donations, links them to donors, and categorizes them based on purpose.
- Highlights the importance of orderly logging of all contributions
- Visualize the use of appropriate data structures for persistent storage.
- Showcase the capability to save donation records even if the program restarts.
- Display a user-friendly GUI using Java Swing or JavaFX.
- Highlight aesthetically pleasing and interactive forms for user input and data display.
